SOP

Despatch Convection Oven

Operating Instructions:

1. Press POWER ON, the display reads (MANUAL).

2. Press↓(HI-LIMIT), press↓.

3. Using the +/- keys, enter the HI-LIMIT to a value lightly higher than the intended SETPOINT.

4. Press↓(SETPOINT), press↓.

5. Using the +/- keys, enter the SETPOINT to the desired operating temperature.

6. Press↓ (READY).

7. Press HEATER ON and START, the HEATER ON light will illuminate. As the oven temperature approaches the SETPOINT, the HEATER ON light will cycle on and off.

8. When the heating cycle is complete, press STOP and HEATER QFF. Do not turn the POWER OFF until the oven temperature is below 100°C (212°F).

For further instructions on the operating modes, please consult the instruction manual.
